

TORNADO AWARENESS

AWR-326

This is an awareness level course for a wide audience. Tornadoes can strike anywhere within the United States, consequently every community needs to be ready for hazards associated with them. This course will fulfill the goals of the “whole community” approach to emergency management, with participants consisting of members from all sectors of the community. Multiple core capabilities will be addressed, with particular emphasis on “public information and warning” and “threats and hazard identification.” Participants who represent different sectors such as mass care services, health and social services, operational communications, critical transportation, and planning would further expand the reach of this course to other corresponding core capabilities.

WHO SHOULD TAKE THIS COURSE

This course is targeted for a broad cross section of professionals involved in emergency management, fire services, local and/ or state government officials, planners, developers, business and education.
