

This one-day (or 8-hour) management-level training course aims to improve hazard mitigation through the implementation of land-use planning tools. The course provides training on the integration of hazard mitigation and land-use planning efforts and on choosing land-use tools that address different natural hazard challenges. The course will include both community-scale land-use planning tools, like comprehensive plans and hazard mitigation plans, as well as site-scale tools like setback requirements and transfer of development rights (TDR) programs.

WHO SHOULD TAKE THIS COURSE

- ✓ Emergency Managers
- ✓ Coastal Zone Managers
- ✓ Private Sector
